Why choose this Program

- The program offers legal professionals intensive education and training in a wide range of legal areas related to information and communication technologies.
- It contributes to the development of interdisciplinary skills, offering competitive advantages in the ever-changing labour market.
- Participants will deepen their understanding of practical, strategic, and contemporary approaches to legal issues related to technology, which will make them key players in workplace decision-making centres.
- The instructors are well-trained and highly experienced international academics and practitioners in the field of law and technology.

Intended participants

The program is designed for lawyers, staff of legal departments of companies and organizations, legal advisors, policy and regulatory experts, and researchers, who wish to develop their knowledge or to systematize and modernize their knowledge on topics related to the way the law deals with technological challenges and adapt to contemporary data and digital challenges of our time.
